Re: City of Bolivar, Missouri
Administrative Order on Consent
Docket No.: CWA-07-2007-0068

Dear Mayor Ealy:

On September 18, 2007, the Environmental Protection Agency (EPA) entered into an Administrative Order on Consent (AOC) with the City of Bolivar, Missouri (City). The AOC required the City to take all necessary measures, to the extent feasible, to eliminate Sanitary Sewer Overflows (SSOs) from its collection system and bypasses at the Wastewater Treatment Facility (WWTF). The City has been reporting SSOs, bypasses and all repairs semi-annually, as required by the AOC.

EPA has reviewed the documents submitted since late 2007 and had determined that the actions taken by the City to address its collection system and WWTF problems are consistent with the AOC. EPA requires the City to continue with its plan of action, as approved by EPA in 2008.

Due to the City's adherence to the EPA-approved plan and the progress documented in its semi-annual reports, the EPA recommends that the City move to an annual report versus a semi-annual report. All documents required by the AOC such as; SSO reports, bypass reports, I&I identification and collection system repairs, preventative maintenance activities, adherence to the approved Plans, and any permit violations are to be included in the annual report. The first annual report is due January 28, 2012 and report on actions for the 2011 calendar year.

Please continue to submit the annual report with the certified statement required in the AOC.
